

Finger Walking Mirror Image Labyrinths: Instructions

1. Photocopy labyrinths on page 2 and page 3 of this pdf.
2. Tape together as shown. You may want to tape the two-piece unit to the table surface so it doesn't slip while you "walk" it.
3. Begin as shown, and "finger-walk" the two labyrinths together. When you get to the centers, "unwind" by retracing the paths.
4. You may want to try reversing the labyrinths (either by untaping and retaping, or printing out two additional labyrinths.)
